

INDEX OF VOLUME XI

Journal of the Cactus and Succulent Society of America
JULY 1939—DECEMBER 1939 (INCLUSIVE)

This six months Index has been made so that all new volumes, from this date, will start with January of each year.

Names of plants are spelled as given in the author's copy. The Journal has made every attempt to assure accuracy of all names used, but does not guarantee them to be so. Items in CAPITAL LETTERS indicate the title of an article. Page numbers in *Italics* (12) indicate an illustration of the item named. " " Quotation marks indicate the title of a book or other work. The letter "G" which precedes a page number refers to the Glossary illustrations. Only full names of persons are indexed. All plant names are in *Italics*.

A.

Abercrombie, Waldie 31, 81
Acanthocalycium 87
Acanthocereus 76
 pentagonus 27, 76
Acapulco 47
Affiliate News 31, 92
AFRICAN STONE FACES 25
Agave Nelsonii 37
 utahensis G97
AIZOACEAE 92

IMPORTANT NOTICE

INDEX VOLUME XI

This six months index has been made so that all future volumes will start in January of each year. Dr. W. L. Jepson of the University of California has suggested this plan for years and we feel that the start of our second ten years seems an opportune time. Dr. Jepson says, "Every botanist, scientist, bibliographer, librarian and binder finds it an advantage when the volumes of a scientific periodical run with the calendar year. Practically all scientific periodicals do conform to the calendar year. Dates become of especial importance, for example, where new species are found in a publication. I suggest, therefore, that the Succulent Journal, Volume XI end with December, 1940."

Volume XII, No. 1, thus starts with this issue. The memberships are not affected unless you prefer to have your renewal start with No. 1 each year; in that case you may add 25c for each month from your expiration to the January issue.

What are your suggestions for binding this small Vol. XI, the "Glossary of Succulent Terms" and the "Ten Year Index"? There are many combinations such as the "Ten Year Index," the "Glossary," and Vol. XI all bound separately; the "Ten Year Index" and Vol. XI bound together. The "Ten Year Index" and "Glossary" bound together, etc. What are your suggestions?

Edgar Baxter is working on the "Ten Year Index" and it will be supplied free to members, perhaps as a supplement starting in July. A series on succulents or "Cacti of Colorado" will start as a supplement in the next issue. Regular subscribers of the JOURNAL should thus assemble a series of valuable books, such as the "Glossary," at no extra cost. Is your JOURNAL worth supporting?

SCOTT E. HASELTON.
